

NO SMOKIN Cube-Style Stationary Fuel Storage Tanks

HEDRA TANKSITIONS

HEDRA 'Cube Style' Stationary Fuel Tanks are a value-engineered solution for the storage and dispensing of diesel, gasoline and lubricant oils from 276 to 2,642 gallons.

They offer a flexible solution to storing combustible liquid as well as improving fuel dispensing and management solutions. A practical stationary design ensures a fast, easy and convenient installation in any location, indoors or outdoors.

HEDRA TANKS ARE A VALUE-ENGINEERED FUEL STORAGE SOLUTION

These modular units ensure fast and easy transportation to site, with minimal site works or preparation required. A place, fill-and-pump installation process offering versatility and speed on commissioning.

The freestanding 'cube style' design allows for 360° tank viewing and inspection. High-grade paint finish ensures longer durability in the elements.

DURABLE STATIONARY DESIGN WITH DOUBLE-WALL CONTAINMENT FOR ADDED SAFETY AND SECURITY.

Our double-walled tanks are designed as integral secondary

containment and therefore do not require independent bunds for leak containment. Double-walled tank = SFL primary tank + interstitial space + secondary external tank.
